About Me

A young enthusiast in the fields of networking, cloud, virtualization, and DevOps, I have gained valuable experience through professional internships and academic projects. With a proven dedication, excellent communication skills, and leadership abilities, I am continually seeking improvement. My goal is to contribute to stimulating projects while remaining open to learning new technologies.

Skills

Cloud Computing :
- Azure (Azure Networking, Azure, Storage Services, Azure Virtual Machines, Azure cli Azure Container Instances Azure Kubernetes Service)
- Kubernetes
- docker,docker compose
- git,github
- Ansible
- Linux
- vmware

Networking :
- IP subnetting (IPV4, iPV6), IP services, Static routing and dynamic (RIP, OSPF, EIGRP, BGP), TCP/IP, UDP, NAT, VLAN , InterVLAN Routing.

Coding :
- python, C,

Tools :
- Plesk, VMware Workstation, Cisco Packet Tracer, mininet

IMAD EDDINE BENAZIZA
Engineer in Telecommunications and Information and Communication Technology (ICT)

Education

- **Engineer in Telecommunications and Information and Communication Technology (ICT)**
- **National School of Telecommunications and Information and Communication Technologies (ENSTTIC) of Oran**
  October 2018 -June 2023
- **Baccalaureate in Experimental Sciences**
  High honors with a grade of 17.00
  june 018

Experience

March 2024: Support Engineer at Icosnet
- ▶ Supporting clients in managing their web hosting, as well as troubleshooting performance and availability issues (Plesk, cPanel).
- ▶ Managing and optimizing messaging solutions, including IceWarp
- ▶ Configuring, troubleshooting, and maintaining Internet connections and dedicated lines.

March - September 2023 : Network Engineer, Backbone Division, Algérie Telecom"
- ▶ Gained knowledge in next-generation multiservice network (NGN).
- ▶ Diagnosed and resolved network issues, including VLAN configuration and routing problems,

mai-aout 2022   Algérie télécom- ingénieur Réseaux
- ▶ Expertise in network troubleshooting and equipment management to ensure stable connectivity
- ▶ Familiarity with cache servers such as Google Cloud CDN to enhance web application performance.
- ▶ Configuration of various routing protocols such as OSPF, MP-BGP, and RIP.

May-August 2021: Mobils - Mobile Network Maintenance Engineer
- ▶ In-depth knowledge of access architectures and techniques for 2G, 3G, and 4G generations.
- ▶ understanding of the operation of 2G, 3G, and 4G equipment.
- ▶ Troubleshooting Base Transceiver Stations (BTS).

Final year project

Study of SDN controller placement problem.
Tools : Mininet , IPRF , HPEVAN
